PROJECTS

ShoppyGlobe: Full-Stack E-Commerce Web Application ↗

Apr 2025

- Built a dynamic e-commerce frontend using React and React Router, with global state management via Redux and Context API for seamless user experience.
- Integrated user-friendly features like product browsing, cart functionality, and order placement with real-time UI updates.
- Extended the application with a scalable backend using Node.js and Express.js, enabling robust API and database interactions.
- Implemented MongoDB for data storage and JWT-based authentication to ensure secure user sessions.
- Connected frontend and backend seamlessly using axios, ensuring smooth communication and performance.

SKILLS

- | | |
|--------------|---------------------------|
| • HTML | • CSS |
| • JavaScript | • Redux |
| • React | • Effective Communication |

Weather Forecast Web App ↗

Dec 2024

- Developed a responsive weather forecast application using JavaScript, focusing on device user experience.
- Integrated real-time weather APIs to fetch and display current conditions and multi-day forecasts.
- Implemented asynchronous API requests and dynamic DOM updates to enhance interactivity.
- Optimized the interface for usability, ensuring smooth navigation and accessibility on both desktop and mobile.
